Hosted by the

Government of Japan

Miharu, Japan

25–28 November 2019

Ref. No.: EVT1805507

Information Sheet

Introduction

The Safety Requirements publication Preparedness and Response for a Nuclear or Radiological Emergency (IAEA Safety Standards Series No. GSR Part 7) was published in 2015 under the joint sponsorship of 13 international intergovernmental organizations. Requirement 5 of this publication requires governments to ensure that protection strategies are developed, justified and optimized at the preparedness stage for taking protective actions and other response actions effectively in a nuclear or radiological emergency so as to achieve the goals of emergency response. The protection strategy needs to include the decision-aiding means for implementing emergency response actions as well as for justifying and optimizing the strategy. The generic and operational criteria as well as the reference level required to be part of the strategy represent such a decision-aiding means.

Objectives

The purpose of the workshop is to train personnel of relevant response organizations on how to develop, justify and optimize protection strategy for a nuclear or radiological emergency, as required in Requirement 5 of IAEA Safety Standards Series No. GSR Part 7, and on expected elements of the strategy.

The workshop will address, in particular, these topics:

- Approaches for development of a protection strategy;
- Planning basis, including hazard assessment;
- Processes of justification and optimization of the strategy;
- Considerations for a justified and optimized strategy;
- Role of the reference level in optimization of the strategy and assessing its effectiveness;
- Application of generic and operational criteria for implementing various emergency response actions;
- Relationship between generic criteria and the reference level;
- Elements of a comprehensive strategy;
- Considerations for implementation of the strategy during an emergency response;
- Relationship with other strategic aspects of the emergency response such as management, monitoring, public communication, etc.

Target Audience

The nominated participants should have responsibilities in preparing for, and responding to, a nuclear or radiological emergency at national, regional, local levels or at the facility level. They are expected to have been involved in the development, justification and optimization of the protection strategy at the national level and in setting the dosimetric framework to guide these processes. The actual work performed by the nominees, as well as relevant background activities in their home countries, will be considered in the selection process. As the workshop will be conducted in English, participants should have sufficient proficiency to follow lectures and express themselves in that language without difficulty. The workshop is limited to 30 participants to allow for active discussions and effective group work.

Participation and Registration

All persons wishing to participate in the event have to be designated by an IAEA Member State or should be members of organizations that have been invited to attend.

In order to be designated by an IAEA Member State, participants are requested to send the **Participation Form (Form A)** to their competent national authority (e.g. Ministry of Foreign Affairs, Permanent Mission to the IAEA or National Atomic Energy Authority) for onward transmission to the IAEA by **10 October 2019**. Participants who are members of an organization invited to attend are requested to send the **Participation Form (Form A)** through their organization to the IAEA by above deadline.

Selected participants will be informed in due course on the procedures to be followed with regard to administrative and financial matters.

Expenditures and Grants

No registration fee is charged to participants.

The IAEA is generally not in a position to bear the travel and other costs of participants in the event. The IAEA has, however, limited funds at its disposal to help meet the cost of attendance of certain participants. Upon specific request, such assistance may be offered to normally one participant per country, provided that, in the IAEA's view, the participant will make an important contribution to the event.

The application for financial support should be made using the **Grant Application Form (Form C)** which has to be stamped, signed and submitted by the competent national authority to the IAEA together with the **Participation Form (Form A)** by **10 October 2019**.
