# **International Workshop on Nuclear Security Measures and Emergency Response Arrangements for Major Public Events**

**Hosted by the**

Government of the United States of America

**through the**

US Department of Energy

**Washington DC, United States of America**

**22–26 June 2020**

**Ref. No.: EVT1905356**

## **Information Sheet**

### **Introduction**

A major public event (MPE) is a planned national or international event, classified by the State as ‘major’, requiring the implementation of safety and security plans. The organization of an MPE in which a large number of people congregate, such as a sporting contest or high level political meeting (which could include high-ranking State authorities), presents complex safety and security challenges for the State hosting the event. Major public events draw great public interest and can receive intense media attention. This makes them attractive venues for demonstrations, protests, violence, or any other action that can be made to bring awareness to a cause. One particular area of concern is organizations which might use these events as stages for criminal acts and acts of terrorism, including the use of nuclear or other radioactive material. Levels of security and surveillance at these events have steadily increased in recent years. The intent of these actions is not only to protect the public from an attack, but also to deter terrorists from attempting to act by overtly displaying a show of force

(i.e. increased presence of visible security and law enforcement), and implementing a strong monitoring presence (i.e. metal detectors, X-ray scanners, explosives detectors).

## Objectives

To enhance participants' awareness and understanding of the planning and execution of Nuclear Security and Emergency Response Plans in support of the overall security and safety for a Major Public Event (MPE). The course will provide best practices for the application of technical and administrative measures for (i) developing the necessary organizational structure; (ii) developing nuclear security and emergency response plans, strategies and concepts of operations; and (iii) making arrangements for implementing the developed plans, strategies and concepts.

## Target Audience

The workshop is intended for the lead or supporting organizations that have responsibilities for planning, preparedness and/or response to safety and security matters. The workshop is open to a maximum of 30 participants who should have duties related to the prevention and detection of, and/or response to, nuclear security events or nuclear and radiological emergencies. Participants should represent, for example, the following organizations: Law enforcement; Radiation safety and security; Fire and ambulance services; Other support organizations, including public information. The designated participant must be responsible for the implementation of nuclear security measures or emergency response arrangements in situations involving nuclear and other radioactive materials. In addition, they should be in a position to sustain activities related to nuclear security or emergency response within their respective organizations upon completion of this workshop.

## Working Language(s)

English

## Participation and Registration

All persons wishing to participate in the event have to be designated by an IAEA Member State or should be members of organizations that have been invited to attend.

In order to be designated by an IAEA Member State, participants are requested to send the **Participation Form (Form A)** to their competent national authority (e.g. Ministry of Foreign Affairs, Permanent Mission to the IAEA or National Atomic Energy Authority) for onward transmission to the IAEA by **15 April 2020**. Participants who are members of an organization invited to attend are requested to send the **Participation Form (Form A)** through their organization to the IAEA by above deadline.

Selected participants will be informed in due course on the procedures to be followed with regard to administrative and financial matters.

Please note that the IAEA is in a transition phase to manage the entire registration process for all

regular programme events electronically through the new InTouch+ (<https://intouchplus.iaea.org>) facility, which is the improved and expanded successor to the InTouch platform that has been used in recent years for the IAEA's technical cooperation events. Through InTouch+, prospective participants will be able to apply for events and submit all required documents online. National authorities will be able to use InTouch+ to review and approve these applications. Interested parties that would like to use this new facility should write to: [InTouchPlus.Contact-Point@iaea.org](mailto:InTouchPlus.Contact-Point@iaea.org).

## **Expenditures and Grants**

No registration fee is charged to participants.

The IAEA is generally not in a position to bear the travel and other costs of participants in the event. The IAEA has, however, limited funds at its disposal to help meet the cost of attendance of certain participants. Upon specific request, such assistance may be offered to normally one participant per country, provided that, in the IAEA's view, the participant will make an important contribution to the event.

The application for financial support should be made using the **Grant Application Form (Form C)** which has to be stamped, signed and submitted by the competent national authority to the IAEA together with the **Participation Form (Form A)** by **15 April 2020**.

## **Visas**

Participants who require a visa to enter the United States of America should submit the necessary application as soon as possible to the nearest diplomatic or consular representative of the United States of America.
