2021-04-08

Excellency,

I have the honour to inform you that the International Atomic Energy Agency (IAEA) will hold the **Consultancy Meeting on the Review of Applicability of Safety Standards to Novel Advanced Reactors - Part 2** (hereinafter referred to as "event") virtually via Microsoft Teams from **10 to 18 May 2021**.

The purpose of the event is to review applicability of the safety standards on reactor design and fuel cycle facilities to novel advanced reactors (including small modular reactors).

The event will be held in English.

The Secretariat understands that Ms Lei Lei (National Nuclear and Radiation Safety Regulation Technology Research Base, Fangshan, Beijing, 100000, China; Email: leilei@chinansc.cn) could make a valuable contribution to the event as an expert and would thus appreciate your Government's consideration to accept her designation by the IAEA.

The IAEA takes no responsibility for, and the provider of the virtual meeting services has represented and warranted that the Services shall not contain, and that no end user shall receive from the software used to hold the virtual meeting, any virus, worm, trap door, back door, timer, clock, counter or other limiting routine, instruction or design, or other malicious, illicit or similar unrequested code, including surveillance software or routines which may, or is designed to, permit access by any person, or on its own, to erase, or otherwise harm or modify any data or any system, server, facility or other infrastructure of any end user (collectively, a "Disabling Code").

I would appreciate receiving your Government's response not later than **3 May 2021**.

Accept, Excellency, the assurances of my highest consideration.

Grzegorz Ludwik Rzentkowski

Director

Division of Nuclear Installation Safety

Department of Nuclear Safety and Security
