The Secretariat of the International Atomic Energy Agency (IAEA) presents its compliments to the IAEA's Member States and has the honour to draw their attention to the **International Training Course on Insider Threats Using the Shapash 3D Model** (hereinafter referred to as "event") to be held at the Nuclear Security Training and Demonstration Centre (NSTDC) in Seibersdorf, Austria, from **25 to 29 August 2025**.

The purpose of the event is to familiarize the participants with nuclear security measures that can be used to address insider threats and cybersecurity vulnerabilities at facilities containing nuclear material using the Shapash 3D Model.

The attached Information Sheet provides further details of the event.

The event will be held in English.

Member States are invited to designate one or more participants for this event. Member States are strongly encouraged to identify women participants.

The IAEA is generally not in a position to bear the travel and other costs of participants in the event. The IAEA has, however, limited funds at its disposal to help meet the cost of attendance of certain participants. Upon specific request, such assistance may be offered to normally one participant per country, provided that, in the IAEA's view, the participant will make an important contribution to the event. The application for financial support should be made via the InTouch+ platform not later than **23 May 2025**, as indicated in the enclosed Information Sheet.

It should be noted that compensation is not payable by the IAEA for any damage to or loss of personal property. The IAEA also does not provide health insurance coverage for participants in IAEA events. Arrangements for private insurance coverage on an individual basis should therefore be made. The IAEA will, however, provide insurance coverage for accidents and illnesses that clearly result from any work performed for the IAEA.

Designations should be submitted to the IAEA via the InTouch+ platform (<https://intouchplus.iaea.org>) through the competent national authority (Ministry of Foreign Affairs, Permanent Mission to the IAEA or National Atomic Energy Authority) not later than **23 May 2025**, as indicated in the enclosed Information Sheet.

The Scientific Secretary of the event will liaise with the participants directly concerning further arrangements, including travel details, as appropriate, once the official designations have been received.

The Secretariat of the International Atomic Energy Agency avails itself of this opportunity to renew to the IAEA's Member States the assurances of its highest consideration.

Information Sheet

Introduction

The event will introduce the concepts that underline the evaluation of preventive and protective measures and explain how these should be applied to enhance nuclear security with regard to insider threats.

Objectives

The objective of the event is to familiarize participants with nuclear security measures that address insider threats, including unauthorized removal of nuclear materials (theft), sabotage and cybersecurity at facilities containing nuclear material. On the basis of lectures and small-group working sessions with exercises, the event will introduce the concepts that underlie the evaluation of preventive and protective measures and explain how these should be applied to enhance nuclear security with regard to insider threats. During the small group sessions, the participants will apply concepts covered in the lectures as they work through practical exercises concerning a hypothetical facility.

Target Audience

The event is designed for participants working in nuclear materials security or nuclear safeguards, in Government ministries, regulatory bodies, law enforcement agencies or operating organizations. The event is intended mainly for persons who are responsible for designing, operating and/or assessing nuclear security systems, including the nuclear material accounting and control (NMAC) components, as well as physical protection measures at nuclear facilities; nuclear security management and staff; operators and managers of NMAC systems; those who prepare associated regulations; persons responsible for computer security at nuclear facilities; and persons from the competent authorities and related law enforcement agencies. Event is open to 40 participants and is held a few times per year.

Additional Information

Six or more months after completion of training events, participants will be required to complete a short survey on the use of acquired knowledge and skills or a change in attitudes. This will assist the Division of Nuclear Security in understanding the impact of its work and will guide future assistance.
