2025-05-16

Excellency,

I have the honour to inform you that the International Atomic Energy Agency (IAEA) will hold the **Consultancy Meeting on the Finalization of the Document Preparation Profile (DPP) for the Revision of Specific Safety Requirements for the Design of Nuclear Power Plants (SSR-2/1 (Rev.1))** (hereinafter referred to as "event") at its Headquarters in Vienna, Austria, from **25 to 27 June 2025**.

In addition, the event will allow for virtual participation via Microsoft Teams.

The purpose of the event is to revise and finalize the DPP for the revision of SSR-2/1 (Rev.1) to incorporate considerations for non-water-cooled reactor technologies, including small modular reactor designs, microreactors, and transportable nuclear power plants.

The event will be held in English.

The Secretariat understands that Mr LI Fu (Institute of Nuclear and New Energy Technology, Tsinghua University, Beijing 100084, China; Email: lifu@tsinghua.edu.cn) could make a valuable contribution to the event as an expert and would thus appreciate your Government's consideration to accept his designation by the IAEA.

We understand that all expenses incurred in connection with the expert's services will be paid by the expert's authorities.

It should be noted that compensation is not payable by the IAEA for any damage to or loss of personal property. The IAEA also does not provide health insurance coverage for participants in IAEA events. Arrangements for private insurance coverage on an individual basis should therefore be made. The IAEA will, however, provide insurance coverage for accidents and illnesses that clearly result from any work performed for the IAEA.

The IAEA takes no responsibility for, and the provider of the virtual meeting services has represented and warranted that the Services shall not contain, and that no end user shall receive from the software used to hold the virtual meeting, any virus, worm, trap door, back door, timer, clock, counter or other limiting routine, instruction or design, or other malicious, illicit or similar unrequested code, including surveillance software or routines which may, or is designed to, permit access by any person, or on its own, to erase, or otherwise harm or modify any data or any system, server, facility or other infrastructure of any end user (collectively, a “Disabling Code”).

I would appreciate receiving your Government’s response **at your earliest convenience**.

Accept, Excellency, the assurances of my highest consideration.

Anna Hajduk Bradford
Director
Division of Nuclear Installation Safety
Department of Nuclear Safety and Security
